

Dr. Masayuki Saijo  
Director, Department of Virology 1  
National Institute of Infectious Diseases, Tokyo, Japan

Dr. Masayuki Saijo obtained his M.D. and his Ph. D. in pediatrics with Professor Yoshioka H and Professor Okuno A, Asahikawa Medical University, in Japan in 1991. He has studied clinical infectious diseases such as RSV infections in children and antiviral-resistant herpes virus infections in immunocompromised subjects. He has joined the National Institute of Infectious Diseases (NIID), Tokyo, Japan, in 1997, and has studied viral hemorrhagic fevers such as Ebola, Marburg, and Crimean-Congo hemorrhagic fevers. His research team is leading in the field of diagnostics and clinical aspects of emerging virus infections including viral hemorrhagic fevers. He heads the Department of Virology 1, NIID, since 2010 as the Director of the Department.
